

E-59A

Met-L-Chek® E-59A is a class 2 (non-halogenated), Method C inspection penetrant remover. Ideal for penetrant wipe removal and pre-inspection surface cleaning, E-59A is a moderate dry rate material used in general metalworking, welding, nuclear, aerospace, and automotive applications.

As a penetrant remover Met-L-Chek® E-59A is sprayed onto wiping media and then the penetrant wiped from the surface. The remover should not be sprayed directly on to the test surface to remove the excess penetrant as the sensitivity will be impaired.
